Application No. 10/674,862 Docket No. P06455US1-153 Reply to Notice of January 7, 2005

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1.-11. (cancelled)

- 12. (new) An overflow assembly for a bathtub, comprising: an overflow pipe having a flange and a sleeve that extends
- outwardly from the flange for receiving an inner end of a hollow fitting having an outer end and threads on an outer surface;
- a nut having a threaded center opening threadably mounted on the fitting to exert pressure towards the flange; and
- the nut having an outer periphery with a series of radially extending lugs which frictionally detachably engage an inner surface of the flange on a cap which fits over the nut.
- 13. (new) An overflow assembly for a bathtub which has a bottom and adjacent side and end walls, and an overflow port in an end wall, comprising:
- an overflow pipe having an upper end portion that extends
 through the overflow port of the bathtub and terminates in
 an end having threads on the outer surface of the hollow
 fitting;
- a flange formed on the upper end of the overflow pipe positioned to engage the outer surface of the bathtub end wall around the bathtub overflow port;
- a nut having a threaded center opening threadably mounted on the upper end portion of the overflow pipe to clamp the

Application No. 10/674,862 Docket No. P06455US1-153 Reply to Notice of January 7, 2005

overflow pipe to the end of the bathtub between the flange and the nut; and

at least one lug extending radially from the nut.

14. (new) The assembly of claim 13 further comprising a cap that is detachably mounted to the lug and covers the nut.
